

## Vertical TeleVantage<sup>®</sup> Conference Manager

# Eliminate dependency on expensive conference bridge services

**Easily extend the capabilities of your phone system with TeleVantage Conference Manager. This turnkey, cost-effective application seamlessly integrates with TeleVantage to eliminate the need for third-party conference services or dedicated conferencing hardware.**

TeleVantage Conference Manager is a powerful tool for creating automated, professional conference calls that facilitate communication and cut costs at the same time. With Conference Manager, teleconferencing is hosted completely by your existing TeleVantage system and network infrastructure. There's no need for expensive third-party conferencing services or dedicated conferencing hardware. Plus, conference setup and administration is easier than ever before.

### **EASY TO SET UP**

Teleconferences have never been easier to arrange in advance or on-the-fly. The intuitive Conference Room Administrator GUI makes setup and configuration quick and easy. TeleVantage Conference Room Administrator can be installed on any PC that has TeleVantage ViewPoint, enabling conferences to be administered from anywhere on the network.

You can preschedule conference calls or set up virtual conference rooms that are available 24/7 for urgent situations. Multiple conference calls can be conducted simultaneously with up to 60 speaking participants and an unlimited number of listen-only parties.

A wide range of conference controls are available. For example, you can configure conference rooms to become available at a certain date for a specified duration. You can establish password entry on a room-by-room basis and play attendees' names or a sound whenever an attendee joins or leaves and enable moderated conferences that give the moderator the option to mute all non-moderator callers and much more (see table of features).

### **EASY TO ATTEND**

Participants can easily join conferences by simply dialing an extension and selecting the conference of their choice or by having an automated invitation connect them at the meeting start time. With TeleVantage Conference Manager, say goodbye to complicated access numbers and codes.

### **LOG, MONITOR AND RECORD**

TeleVantage Conference Manager works seamlessly with all other TeleVantage features. You can view, manage and record conference calls in the ViewPoint<sup>™</sup> Call Monitor, and use the TeleVantage Call Log to keep track of who was in a conference and for how long, and more.

# Vertical TeleVantage® Conference Manager

## Selected Features of TeleVantage Conference Manager

Conference up to 60 speaking parties and an unlimited number of listen-only parties.

Conduct multiple conference calls simultaneously in an unlimited number of different conference rooms.

Play attendee names of a customizable sound whenever an attendee joins or leaves.

Announce the number of active participants to new attendees.

Moderated conference options: always mute non-moderators; mute when a moderator joins; mute until a moderator joins.

Multiple conference administrators can set up conferences, but be prevented from editing each other's conferences.

Automatically route callers to a particular conference room, or verbally prompt them to parties.

Optionally require password entry to a conference.

Automatically place outbound invitation calls to a list of invitees and add them to a conference.

Schedule conference rooms to be available all the time or only on a certain date for a limited amount of time.

Play warning messages when a conference is about to end; extend conference durations if the moderator continues to participate.

Create conferences that limit the number of attendees, restrict attendees to TeleVantage users or prevent users from talking without a moderator.

Manage and view conference participants using the TeleVantage Call Monitor.

See a history of conference attendees and how long they participated using the TeleVantage Call Log.

### SPECIFY WITH CONFIDENCE
